

150mm Bush Hammer Plate for Angle Grinders

This 150mm bush hammer plate is specially designed to be used on Angle grinders. It has 4 bush hammer heads and each head has 30 pieces of high-quality carbide teeth. With a connection of M14, it can be used on most angle grinders. We can customize the connection for different angle grinders, such as Bosch, Hilti, Makita, etc.

Bush hammering can be such an easy thing with angle grinders. It's ideal for small projects. Easy to carry, easy to operate and can be used in narrow places.

After you have this bush hammer plate, you can make the surface different. Whether you just want to create a beautiful finish on the surface of granite, marble, concrete, or you want to do it with some functional reasons(like create non-slip surfaces). It's a good choice.
